

KrishiCore AI — One-Page Demo Checklist

Quick flow to demo core features (5–8 minutes)

1) Setup

- Start dev server: `cd frontend && npm install && npm run dev`
- Open the site at **http://localhost:5173/**

2) Home (15s)

- Open home — check header shows **KrishiCore AI** and nav links.

3) Crops (2 min)

- Open **Crops** → Recommendations tab: set N/P/K/pH and click *Get Recommendation*. Expect recommendations (online) or cached/offline fallback.
- Soil Analysis: enter pH/N/K and click *Analyze*. Must work while offline.
- Fertilizer Calculator: enter crop and area → Calculate. Must work while offline.

4) Scan — Photo Scan (1–2 min)

- Open **Scan**. Upload a leaf photo and click *Analyze*.
- Online: AI reply with disease, confidence, treatment. Offline: deterministic fallback result and offline badge.
- Share result via WhatsApp or Talk to AI Expert.

5) PWA / Offline Demo (1 min)

- Install app (browser Install prompt). With app open, toggle DevTools → Network → Offline and reload.
- Verify Crops → Soil & Fertilizer and Scan → Photo fallback work while offline.

6) Troubleshooting

- If a page is blank: DevTools → Application → Clear storage → Reload.
- If AI call times out: retry with network enabled or use cached offline flows.

Prepared for your demo — print to PDF from the browser (File → Print → Save as PDF).
